Judson H. Turner, Director  
Georgia Department of Natural Resources  
Environmental Protection Division  
2 Martin Luther King Jr. Drive, S.E.  
Suite 1152 East  
Atlanta, GA 30334

Dear Mr. Turner:

We have reviewed the proposed changes to the Georgia regulations Radioactive Materials, Chapter 391-3-17, received by our office on February 19, 2013. These regulations were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) rules in 10 CFR Parts 19, 20, 30, 31, 32, 33, 35, 40, 61, 70, and 150 and the requirements of the five amendments identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with Chuck Mueller on April 10, 2013.

As a result of our review, we have 24 comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that the Georgia regulations meet the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final Georgia regulations. However, we have determined that if your proposed regulations were adopted, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure [SA-200](#), "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to us for review. As requested in FSME Procedure [SA-201](#), "Review of State Regulatory Requirements," please highlight the final changes, and provide a copy to Division of Materials Safety and State Agreements, FSME.

The SRS Data Sheet summarizes our knowledge of the status of other Georgia regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the FSME website: <http://nrc-stp.ornl.gov/rulemaking.html>.

NRC's 10 CFR 32.11 is a Compatibility Category NRC and therefore a State cannot have an equivalent provision.</p> <p>GA needs to make the above changes in order to meet the Compatibility Category B designation assigned to 10 CFR 30.14.</p>

6	391-3-17-.02 (3)(c)3.	30.20(a)	2007-3	B	<p><b>Gas and aerosol detectors containing byproduct material</b></p> <p>GA references a GA regulation that is designated as a Compatibility NRC. GA needs to change .02(3)(c)3.(i) to read "...initially transferred in accordance with a specific license issued by the U.S. Nuclear Regulatory Commission pursuant to Section 32.26 of 10 CFR, Part 32; which authorizes the transfer of the detectors to persons who are exempt from regulatory requirements."</p> <p>GA needs to remove all references to Section (11)(c) and replace those with 10 CFR 32.26 in 391-3-17-.02(3)(c)(3). Accordingly GA also needs to delete 391-1-17-.02(11)(c) since this regulation is a Category NRC.</p> <p>GA needs to make the above changes in order to meet the Compatibility Category B designation assigned to 10 CFR 30.20(a).</p>
7	391-3-17-.02 (21)(b)	30.71	2007-3	B	<p><b>Schedule B</b></p> <p>GA needs to remove the entires for Carbon 11, Nitrogen13, and Oxygen 15 from its table. These items are not listed in NRC's Schedule B and therefore would fall under the Category "Any byproduct material not listed above other than alpha emitting byproduct material." The value for this is 0.1 microcuries.</p> <p>GA needs to make the above change in order to meet the Compatibility Category B designation assigned to 10 CFR 30.71 Schedule B.</p>

GA needs to add Radium-226, .001 (Release Fraction), 100 (Quantity in curies) and Mixed Corrosion products, .01 (Release Fraction), 10,000 (Quantity in curies).</p> <p>GA needs to make the above change in order to meet the Category H&amp;S designation assigned to 10 CFR 30.72.</p>
9	391-3-17-.02(6)(c)	31.5	2007-2 2007-3	C	<p><b>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</b></p> <p>GA needs to delete “distribute” and replace it with the phrase “initially transferred” in 391-3-17-.02(11)(d)(1).</p> <p>GA has the wrong record retention requirements in (6)(c)(3)(iv). GA requires records of tests to be kept for one year after the next required test. NRC requires the records to be kept for three years after the next required test. GA is less restrictive. GA needs to change their record retention requirements to at least 3 years for each test in (6)(c)(3)(iv).</p> <p>GA omits an equivalent to 10 CFR 31.5(c)(7).</p> <p>GA needs to change (6)(c)(3)(vii) to state “ Shall transfer or dispose of the device containing radioactive material only by export as provided by 10 CFR (c)(7) [Insert GA reference once adopted as noted in the comment</p>

The paragraph should read “May designate a nuclear pharmacist in accordance with Rule .05(26) as an authorized nuclear pharmacist if the individual was a nuclear pharmacist preparing only radiopharmaceuticals containing accelerator produce radioactive material and the individual practiced at a Government Agency or Federally recognized Indian Tribe before November 30, 2007 or at all other pharmacies before August 8, 2009, or</p>
