Dear Mr. Marshall:

We have reviewed the License Conditions related to the 10 CFR amendments; *“Energy Compensation Sources for Well Logging and Other Regulatory Clarifications”*, *“Respiratory Protection and Controls to Restrict Internal Exposures”* and *“Transfer for Disposal and Manifests; Minor Technical Conforming Amendment”* submitted to the Nuclear Regulatory Commission (NRC) electronically on July 10 and July 16, 2003. Our review and comments are in response to the State’s request for NRC evaluation of the License Conditions to meet the requirements of the amendments identified on the States Regulation Status Data Sheet (SRS). These License Conditions were reviewed by comparison to the equivalent NRC rules in 10 CFR Parts 20 and 39 and the requirements of the three amendments identified in the enclosed SRS. We discussed our review of the regulation with Larry Boschult on July 17, 2003.

As a result of our review, we have no comments. However, as discussed with Larry Boschult on July 17, 2003, we recognize that you have omitted the requirements of 10 CFR §39.55, *“Tritium Neutron Generator Target Source”* because no licensees in Nevada are authorized to possess neutron resources. Please be advised that the license conditions must include this section should a licensee possess neutron test sources in the future. Please note that we have limited our review to regulations required for compatibility and/or health and safety.

The SRS Data Sheet summarizes our knowledge of other Nevada regulations. Please let us know if you note any inaccuracies or have any comments on the information contained in the SRS Data Sheet. This letter including the SRS Data Sheet is posted on the STP Web Site: <http://www.hsr.doe.gov/nrc/rulemaking.htm>.

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me or John Zabko at (301) 415-2308 or JGZ@NRC.GOV.

Sincerely,

IRA by Josephine Piccone
