NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

(FSME-11-040, May, Program, 10 CFR 74, MC&A)

May 17, 2011

ALL AGREEMENT STATES, MICHIGAN STATE LIAISON OFFICERS

OPPORTUNITY TO COMMENT ON PRELIMINARY PROPOSED RULE LANGUAGE FOR
MATERIAL CONTROL AND ACCOUNTING OF SPECIAL NUCLEAR MATERIAL
REGULATIONS (FSME-11-040)

Purpose: The Nuclear Regulatory Commission (NRC or Commission) is making available for comment preliminary proposed rule language concerning the NRC's proposed amendments to the material control and accounting (MC&A) regulations.

Background: The NRC plans to amend Parts 72, 74, and 150 to Title 10 of the *Code of Federal Regulations* (10 CFR). The majority of the changes would be to the MC&A provisions in 10 CFR Part 74. Licensees authorized by an Agreement State to possess and use special nuclear material are currently required to submit material status reports to the NRC via the Nuclear Materials Management and Safeguards System (NMMSS). The reporting requirements are currently located in 10 CFR 150.17(a) which would be revised to conform to the proposed revisions to 10 CFR 74.13. No substantive changes would be involved. The changes to 10 CFR 150.17(a) only clarify the existing requirements.

Discussion: The NRC is making the preliminary proposed rule language summarized above available to inform stakeholders of the current status of this proposed rulemaking, and is inviting comment on the language. This preliminary proposed rule language may be subject to significant revisions during the rulemaking process. Stakeholder input at this stage will help inform the development of the proposed rule. The NRC will review and consider any comments
