

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

September 22, 2024

ALL AGREEMENT STATES
CONNECTICUT, INDIANA, WEST VIRGINIA
NRC REGIONS I, III, AND IV

NOTIFICATION OF INTEGRATED MATERIALS PERFORMANCE EVALUATION PROGRAM
(IMPEP) TEAM MEMBER ROSTER UPDATE (STC-24-049)

Purpose: To provide Agreement States, U.S. Nuclear Regulatory Commission (NRC) Regions I, III, and IV, and the Office of Nuclear Material Safety and Safeguards with the opportunity to select staff to participate in Integrated Materials Performance Evaluation Program (IMPEP) reviews.

Background: It is the policy of the NRC to evaluate the Agreement State and NRC radiation control programs in an integrated manner using common and non-common performance indicators, as specified in Management Directive [5.6](#), *Integrated Materials Performance Evaluation Program (IMPEP)*. The NRC conducts periodic reviews of radiation control programs to ensure that public health and safety are adequately protected from the potential hazards associated with the use of radioactive materials and that Agreement State programs are compatible with the NRC's program. The IMPEP process uses a team comprised of Agreement State and NRC staff to perform the reviews. The State Agreements (SA) Procedure [111](#), *Formal Qualifications for Integrated Materials Performance Evaluations Program Team Members and Team Leaders*, provides the details on the formal qualifications for IMPEP team members. The NRC maintains a roster of qualified IMPEP team members and uses this roster to staff future IMPEP review teams. Please note that the IMPEP review process takes 90-105 days, including approximately one week to prepare for the review, one week to conduct the review, one week to document the results, and a day to make a presentation to the Management Review Board.

Action Requested: Please review¹ the enclosed IMPEP team member roster to identify staff that should be:

1. Removed from the roster due to promotions, retirement, or other circumstances, or
2. Added to the roster as a result of new hires, transfers, or new/additional qualifications.

Discussion: The NRC would appreciate receiving any updates to the roster within 14 days of the date of this letter. The NRC will review all proposed updates, revise the roster as appropriate, post the roster on the NRC's IMPEP Toolbox Web site at <https://www.nrc.gov/materials/toolboxes/impep.html> and use the updated roster to identify candidates to support future IMPEP review teams.

¹ This information request has been approved by OMB 3150-0029 expiration 1/31/2025. The estimated burden per response to comply with this voluntary collection is approximately 30 minutes. Send comments regarding the burden estimate to the FOIA, Library, and Information Collections Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by e-mail to infocollects.resource@nrc.gov, and to OMB Office of Information and Regulatory Affairs (3150-0029), Attn: Desk Officer for the Nuclear Regulatory Commission, 725 17th Street, NW Washington, DC 20503. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Next Steps: The NRC will review the revised roster to identify IMPEP review team member candidates for an upcoming IMPEP team member training (FY 2025) or IMPEP refresher training. In accordance with SA-111, IMPEP team members need to maintain core qualifications by attending IMPEP Team Member Training, participating in an IMPEP review within a 2-year period, or taking refresher training. The NRC IMPEP Project Manager will coordinate with supervisors and IMPEP Team Leaders to identify candidate team members for upcoming IMPEP reviews.

If you have any questions regarding this correspondence, please contact the individual listed below:

POINT OF CONTACT: Robert Johnson
TELEPHONE: (301) 415-7314
