

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
WASHINGTON, D.C. 20555-0001

July 17, 2015

ALL AGREEMENT AND NON-AGREEMENT STATES
STATE LIAISON OFFICERS

NOTIFICATION OF AN UPCOMING WEBINAR ON ENVIRONMENTAL MONITORING
(STC-15-054)

Purpose: To provide notification that the U.S. Nuclear Regulatory Commission (NRC) staff will conduct an Environmental Monitoring Webinar on August 12, 2015, as part of the ongoing State Liaison Officers (SLOs) Webinar training series.

Background: The NRC reactor licensees are required to prepare annual effluent and environmental reports for their sites. The reports are submitted to NRC for review and inspection and are available to the public on the NRC public Web site. A SLO Series Webinar was held in March on effluents discharges; this Webinar on Environmental Monitoring is a follow on.

Discussion: The NRC continues to seek ways to provide technical support for training and to engage States and Tribes on topics. This Webinar addresses the monitoring and detection of noble gases, tritium, iodine, and particulates (e.g., cobalt, manganese) in various environmental pathways including food, water, and air; and direct radiation exposure.

This "Environmental Monitoring" webinar is scheduled for August 12, 2015, from 2 p.m. – 3 p.m. (ET). Participants must register in advance of the webinar at the following link: <https://attendee.gotowebinar.com/register/4626332979888504577>.
