ALL AGREEMENT STATES

**TRAINING COURSE LIST FOR CALENDAR YEAR 2012 (FSME-11-091)**

**PURPOSE:** The U.S. Nuclear Regulatory Commission (NRC) staff has updated the list of courses for Calendar Year 2012 that directly relate to the Agreement State programs (Enclosure 1).

**BACKGROUND:** The NRC will be funding Agreement State staff training and associated travel to attend the current courses offered through the NRC training program for materials licensing and inspection staff. We believe the continuation of this funding will enhance your program and foster national consistency in the implementation of the materials licensing and inspection programs nationwide. The States may still need to provide certain training to their staff not covered by NRC's current training program (5-week health physics, radiological emergency response, x-ray courses, mammography, etc.).

**DISCUSSION:** We have also enclosed the standard application form (Enclosure 2). Please complete the application form for each person attending a course and submit it to the Office of Federal and State Materials and Environmental Management Programs, Division of Materials Safety and State Agreements - ATTN: Brenda Usilton. Applications may be submitted at any time; however, applications should be received by FSME/MSSA a minimum of eight (8) weeks prior to the beginning of the course. At that time, if you have more than one application from your State for a particular course, you will need to prioritize each person. It is not guaranteed that all students from one State will get into any one given course. The process for selecting the individual for training are based on SA-600 "Training Criteria for Agreement State Personnel." Prioritization is based on a number of factors such as including becoming an Agreement State, IMPEP Heightened oversight for staffing and training, other hardship approved by FSME management in advance of submittal of application, etc. We do want to make sure we equitably distribute the slots so all States have a chance to be trained. FSME will identify the students for a course based on SA-600. Applications received after the eight week deadline will not be considered unless there is a cancellation by one of the students identified.

A letter of acceptance will be sent to each Program Director with instructions for completing the travel authorization. The travel authorization will need to be completed 30 days prior to the beginning of the course.

\*\* This information request has been approved by OMB 3150-0029 expiration 11/30/2013. The estimated burden per response to comply with this voluntary collection is approximately 8 hours. Send comments regarding the burden estimate to the Records and FOIA/Privacy Services Branch (T-5F52), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by Internet e-mail to [infocollects@nrc.gov](mailto:infocollects@nrc.gov), and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202 (3150-0029), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

The complete list of all technical training courses can be viewed at <http://nrc-stp.ornl.gov/training.html> as well as all the Agreement State letters of acceptance, training application, course descriptions, the voucher and instructions for processing the voucher. If there is a "TBD" listed beside a course that means no date or location has been established. As dates and locations for these courses are established, we will post them under the "What's New" area on our home page at the same website as above. Other changes to the course schedule will also be noted on the "What's New" area of the home page.
