§20.1003	Definitions		A	Amended Definition: Background radiation			
§20.1003	Definitions		B	Added Definition: Critical Group			
§20.1003	Definitions		C	Added Definition: Decommission			
§20.1003	Definitions		B	Added Definition: Distinguishable from background			
§20.1003	Definitions		B	Added Definition: Residual radioactivity			
§20.1401	General provisions and scope		C	Added Section to read as follows: (a) The criteria in this subpart apply to the decommissioning of facilities licensed under parts 30, 40, 50, 60, 61, 70, and 72 of this chapter, as well as other facilities subject to the Commission's jurisdiction under the Atomic Energy Act			

Change to NRC Section	Title	State Section	Category	Summary of Change	Difference Yes/No	Significant Yes/No	If Difference, Why or Why Not Was a Comment Generated
				<p>of 1954, as amended, and the Energy Reorganization Act of 1974, as amended. For high-level and low-level waste disposal facilities (10 CFR parts 60 and 61), the criteria apply only to ancillary surface facilities that support radioactive waste disposal activities. The criteria do not apply to uranium and thorium recovery facilities already subject to appendix A to 10 CFR part 40 or to uranium solution extraction facilities.</p> <p>(b) The criteria in this subpart do not apply to sites which:</p> <p>(1) Have been decommissioned prior to the effective date of the rule in accordance with criteria identified in the Site Decommissioning Management Plan (SDMP) Action Plan of April 16, 1992 (57 FR 13389);</p> <p>(2) Have previously submitted and received Commission approval on a license termination plan (LTP) or decommissioning plan that</p>			

Change to NRC Section	Title	State Section	Category	Summary of Change	Difference Yes/No	Significant Yes/No	If Difference, Why or Why Not Was a Comment Generated
				<p>is compatible with the SDMP Action Plan criteria; or</p> <p>(3) Submit a sufficient LTP or decommissioning plan before August 20, 1998 and such LTP or decommissioning plan is approved by the Commission before August 20, 1999 and in accordance with the criteria identified in the SDMP Action Plan, except that if an EIS is required in the submittal, there will be a provision for day-for-day extension.</p> <p>(c) After a site has been decommissioned and the license terminated in accordance with the criteria in this subpart, the Commission will require additional cleanup only if, based on new information, it determines that the criteria of this subpart were not met and residual radioactivity remaining at the site could result in significant threat to public health and safety.</p> <p>(d) When calculating TEDE to the average member of the critical group the licensee</p>			

Change to NRC Section	Title	State Section	Category	Summary of Change	Difference Yes/No	Significant Yes/No	If Difference, Why or Why Not Was a Comment Generated
				shall determine the peak annual TEDE dose expected within the first 1000 years after decommissioning.			
§20.1402	Radiological criteria for unrestricted use		C	<p>Added Section to read as follows: A site will be considered acceptable for unrestricted use if the residual radioactivity that is distinguishable from background radiation results in a TEDE to an average member of the critical group that does not exceed 25 mrem (0.25 mSv) per year, including that from groundwater sources of drinking water, and the residual radioactivity has been reduced to levels that are as low as reasonably achievable (ALARA). Determination of the levels which are ALARA must take into account consideration of any detriments, such as deaths from transportation accidents, expected to potentially result from decontamination and waste disposal.</p>			

Change to NRC Section	Title	State Section	Category	Summary of Change	Difference Yes/No	Significant Yes/No	If Difference, Why or Why Not Was a Comment Generated
§20.1403	Criteria for license termination under restricted conditions		C	<p>Added Section to read as follows: A site will be considered acceptable for license termination under restricted conditions if:</p> <p>(a) The licensee can demonstrate that further reductions in residual radioactivity necessary to comply with the provisions of Sec. 20.1402 would result in net public or environmental harm or were not being made because the residual levels associated with restricted conditions are ALARA. Determination of the levels which are ALARA must take into account consideration of any detriments, such as traffic accidents, expected to potentially result from decontamination and waste disposal;</p> <p>(b) The licensee has made provisions for legally enforceable institutional controls that provide reasonable assurance that the TEDE from residual radioactivity distinguishable from background to the average member of the critical group will not exceed 25 mrem (0.25 mSv) per year;</p> <p>(c) The licensee has</p>

§20.1404	Alternate criteria for license termination		C	<p>Added Section to read as follows:</p> <p>(a) The Commission may terminate a license using alternate criteria greater than the dose criterion of Secs. 20.1402, 20.1403(b), and 20.1403(d)(1)(i)(A), if the licensee--</p> <p>(1) Provides assurance that public health and safety would continue to be protected, and that it is unlikely that the dose from all man-made sources combined, other than medical, would be more than the 1 mSv/y (100 mrem/y) limit of subpart D, by submitting an analysis of possible sources of exposure;</p> <p>(2) Has employed to the extent practical restrictions on site use according to the provisions of Sec. 20.1403 in minimizing exposures at the site; and</p> <p>(3) Reduces doses to ALARA levels, taking into consideration any detriments such as traffic accidents expected to potentially result</p>

				<p>from decontamination and waste disposal.</p> <p>(4) Has submitted a decommissioning plan or License Termination Plan (LTP) to the Commission indicating the licensee's intent to decommission in accordance with Secs. 30.36(d), 40.42(d), 50.82 (a) and (b), 70.38(d), or 72.54 of this chapter, and specifying that the licensee proposes to decommission by use of alternate criteria. The licensee shall document in the decommissioning plan or LTP how the advice of individuals and institutions in the community who may be affected by the decommissioning has been sought and addressed, as appropriate, following analysis of that advice. In seeking such advice, the licensee shall provide for:</p> <p>(i) Participation by representatives of a broad cross section of community interests who may be affected by the decommissioning;</p>
