NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

May 1, 2015

Ms. Cynthia L. Becker, Chief
Bureau of Radiation Control
Department of Health
4052 Bald Cypress Way, Bin C21
Tallahassee, FL 32399-1741

Dear Ms. Becker:

We have reviewed the final revision to the Florida regulations, Florida Administrative Code Rules 64E-5, "Control of Radiation Hazard Regulations," received by our office on March 11, 2015. These regulations were reviewed by comparison to the equivalent U.S. Nuclear Regulatory Commission (NRC) rules and the requirements of the ten amendments identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with Michael Stevens on April 30, 2015.

As a result of our review, we have 30 comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. We have determined that if these regulations are revised, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Nuclear Material Safety and Safeguards (NMSS) Procedure [SA-200](#), "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when you revise your regulations to address our comments, a copy of the "as published" regulations be provided to us for review. As requested in NMSS Procedure [SA-201](#), "Review of State Regulatory Requirements," please highlight the location of any changes made by Florida, in response to our comments, and provide a copy to Division of Material Safety, State, Tribal, and Rulemaking Programs, NMSS. The SRS Data Sheet summarizes our knowledge of the status of other Florida regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the NMSS Web site: <http://nrc-stp.ornl.gov/rulemaking.html>.

C. Becker

					FL needs to add equivalent rule language to 10 CFR 32.51a(c) to 64E-5.210(4)(d) in order to meet the Compatibility Category B designation assigned to 10 CFR 32.51(a).

					<p>equivalent regulation in 10 CFR 32.72, thereby making Florida's regulation less restrictive.</p> <p>FL omits an equivalent regulation to 10 CFR 32.72(a)(2)(iv). FL needs to add equivalent language to 64E-5.210(10).</p> <p>FL omits the wording "the radiation symbol and" between "distribution includes" and "the words" in 64E-5.210(10)(d)2.</p> <p>FL omits equivalent rule text to 10 CFR 32.72(b). FL needs to add equivalent rule text to 64E-5.210(10). [*Note FL states that 64E-5.210(10)(f) satisfies all the requirements of 30.34(j)(4) which references 32.72(b)(5) which ensures that the pharmacist is an Authorized Nuclear Pharmacist. 64E-5.210(10)(f)1. requires 64E-5.210(1)(b) is followed which requires an Authorized Nuclear Pharmacist. However, because FL does not adopt language equivalent to 10 CFR 32.72(b) which discusses not only who can use it but who can prepare it [which is not described in 64E-5.210(10)(1)(b)), adopting rule language that references it and then not being able to put in a pointer to the correct FL section or adoption of the NRC section by reference therefore means that FL does not have equivalent rule language adopted].</p> <p>FL needs to make the above changes in order to meet the Compatibility Category B designation assigned to 10 CFR 32.72.</p>
