Ray Rusin, Chief
Office of Facilities Regulation
Rhode Island Department of Health
3 Capitol Hill, Room 305/306
Providence, RI 02908

Dear Mr. Rusin:

We have reviewed the proposed changes to the Rhode Island regulations "Rules and Regulations for the Control of Radiation," received by our office on August 29, 2013. These regulations were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) rules in 10 CFR Parts 19, 20, 30, 31, 32, 33, 34, 35, 36, 39, 40, 61, 70, 71, 150 and the requirements of the 15 amendments identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with William Dundulis on December 2, 2013.

As a result of our review, we have 39 comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that the Rhode Island regulations meet the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final Rhode Island regulations. However, we have determined that if your proposed regulations were adopted, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure [SA-200](#), "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to us for review. As requested in FSME Procedure [SA-201](#), "Review of State Regulatory Requirements," please highlight the final changes, and provide a copy to Division of Materials Safety and State Agreements, FSME.

The SRS Data Sheet summarizes our knowledge of the status of other Rhode Island regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the FSME website: <http://nrc-stp.ornl.gov/rulemaking.html>.
