

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 3, 2016

Mr. Ryan Schierman
Program Manager of Natural Resources
Wyoming Department of Environmental Quality
Land Quality Division
122 W. 25th Street
Herschler 4W
Cheyenne, WY 82002

Dear Mr. Schierman:

We have reviewed the proposed revisions to the Wyoming regulations Chapter 1, General Provisions, and Chapter 3, Radiation Protection Standards, received by our office on January 11, 2016. These regulations were reviewed by comparison to the equivalent U.S. Nuclear Regulatory Commission (NRC) regulations rules in Title 10 of the Code of Federal Regulations (CFR) Part 20. Regulations that do not directly correspond to the Part 20 requirements will be reviewed when we receive regulatory packages showing their relationship to the other relevant provisions in the Title 10 of the CFR. We discussed our review of the regulations with you on September 28, 2016.

As a result of our review, we have 33 comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that the Wyoming regulations meet the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final Wyoming regulations. However, we have determined that if your proposed regulations were adopted, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Nuclear Material Safety and Safeguards (NMSS) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to us for review. As requested in NMSS Procedure SA-201, "Review of State Regulatory Requirements," please highlight the final changes, and provide a copy to Division of Material Safety, State, Tribal, and Rulemaking Programs, NMSS.

The State Regulation Status (SRS) Data Sheet summarizes our knowledge of the status of Wyoming regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the NMSS State Communication Portal:

COMPATIBILITY COMMENTS ON WYOMING PROPOSED REGULATIONS

STATE SECTION	NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
1	Chapter 1, General Provisions, Sections 2-3	20.1001 20.1002	N/A	<p>D</p> <p>Purpose and Scope</p> <p>The use of the terms source material, milling and byproduct material will need to be coordinated with the terms as provided in Wyoming’s enabling legislation. For example, the NRC comments require revising the legislation to state WY is obtaining authority over “source material involved in milling and the resulting byproduct material as specified in the act.” We recommend deleting reference to uranium "recovery" throughout the statute and regulations to be consistent with the AEA, UMTRCA and the NRC regulatory provisions that only use the term “milling”.</p> <p>Comment stands from NRC letter 3/15/2016, ML16035A488</p>
